Introduction:

It was a desktop base application .It is easily calculated any shops remaining amount. it is easy to usage. How much money the shopkeeper earns and spends per day in his shop . Shop owner can add any customer. he doesn't have to remember how much money due is?

These apps will remember for him. Shop owners can easily delete and updates any customer information.

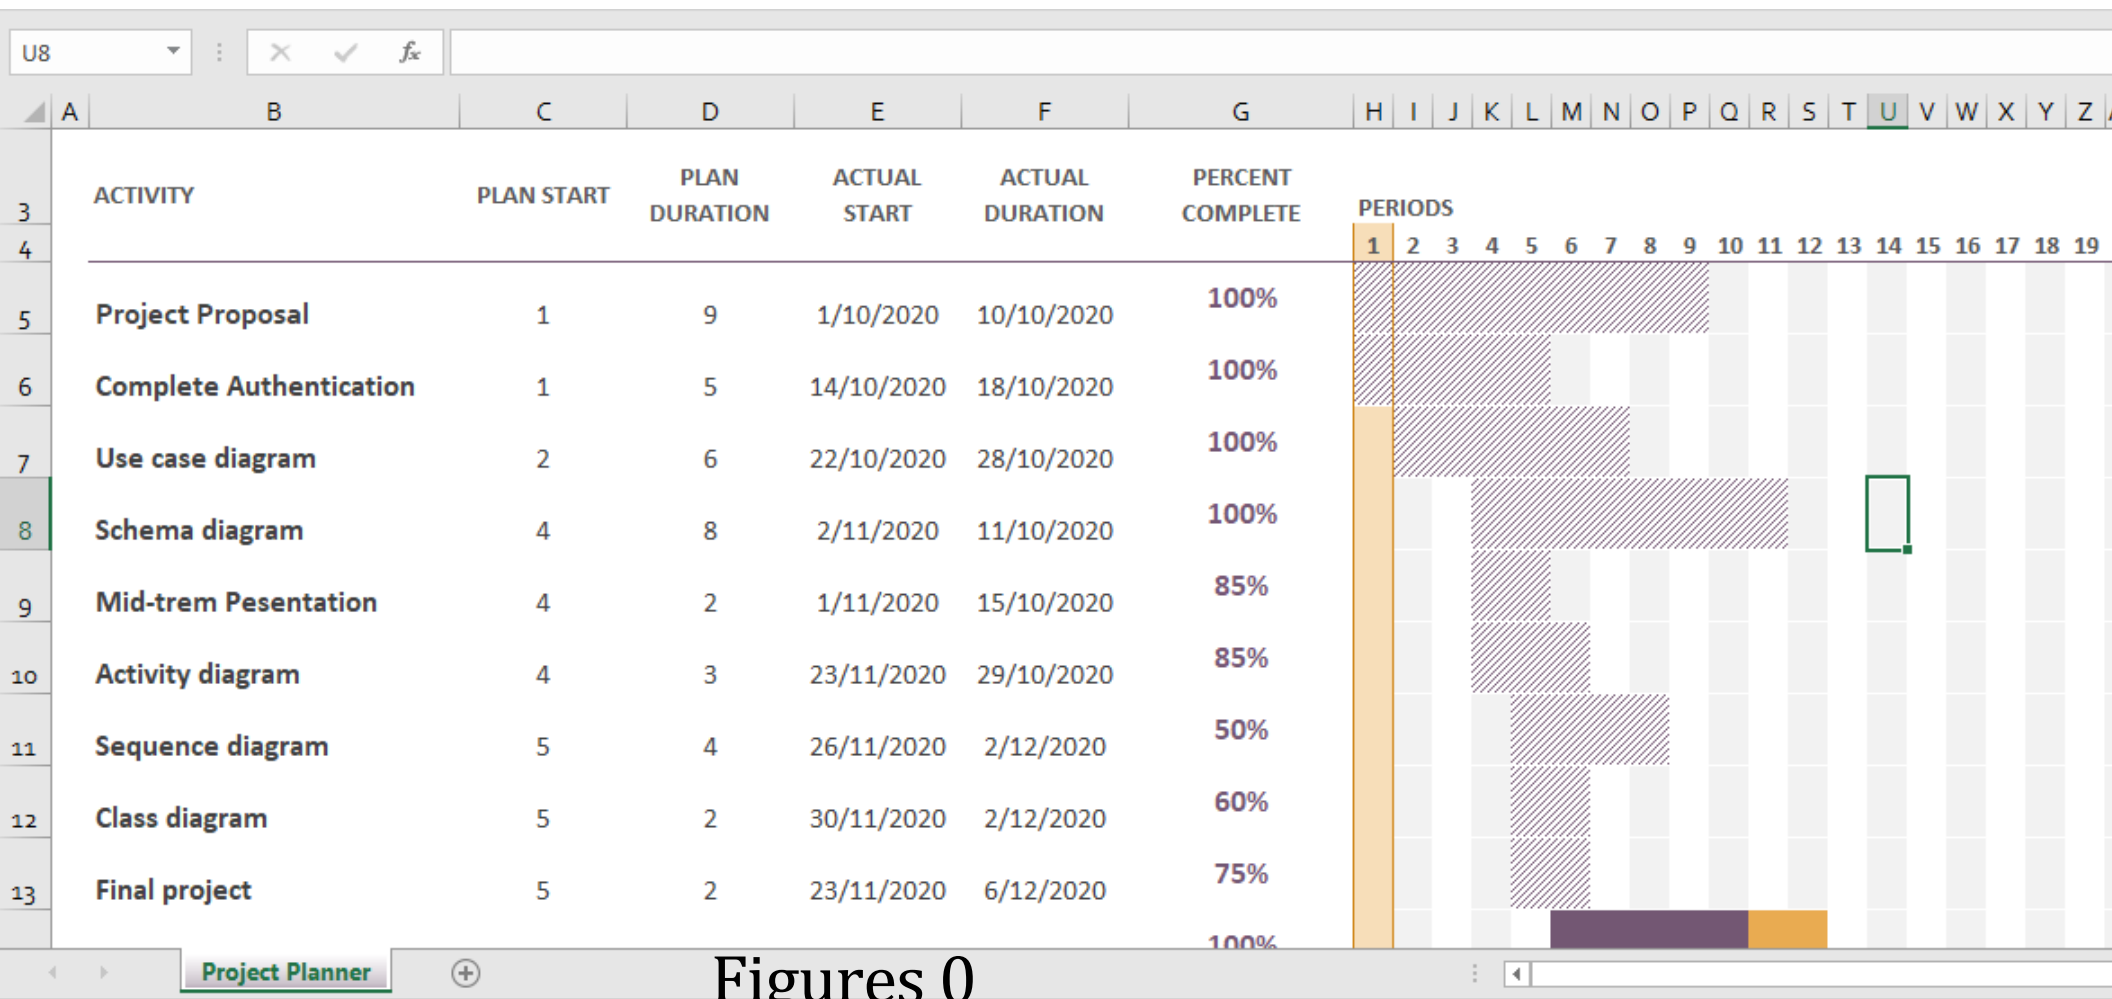

Problem statement:

- 1.Shopkeeper are calculate the due money by note book .This process are very old.
2. It was takes time too much
- 3.When shopkeepers are calculates by note books he will be mistakes any calculation.

Proposed solution:

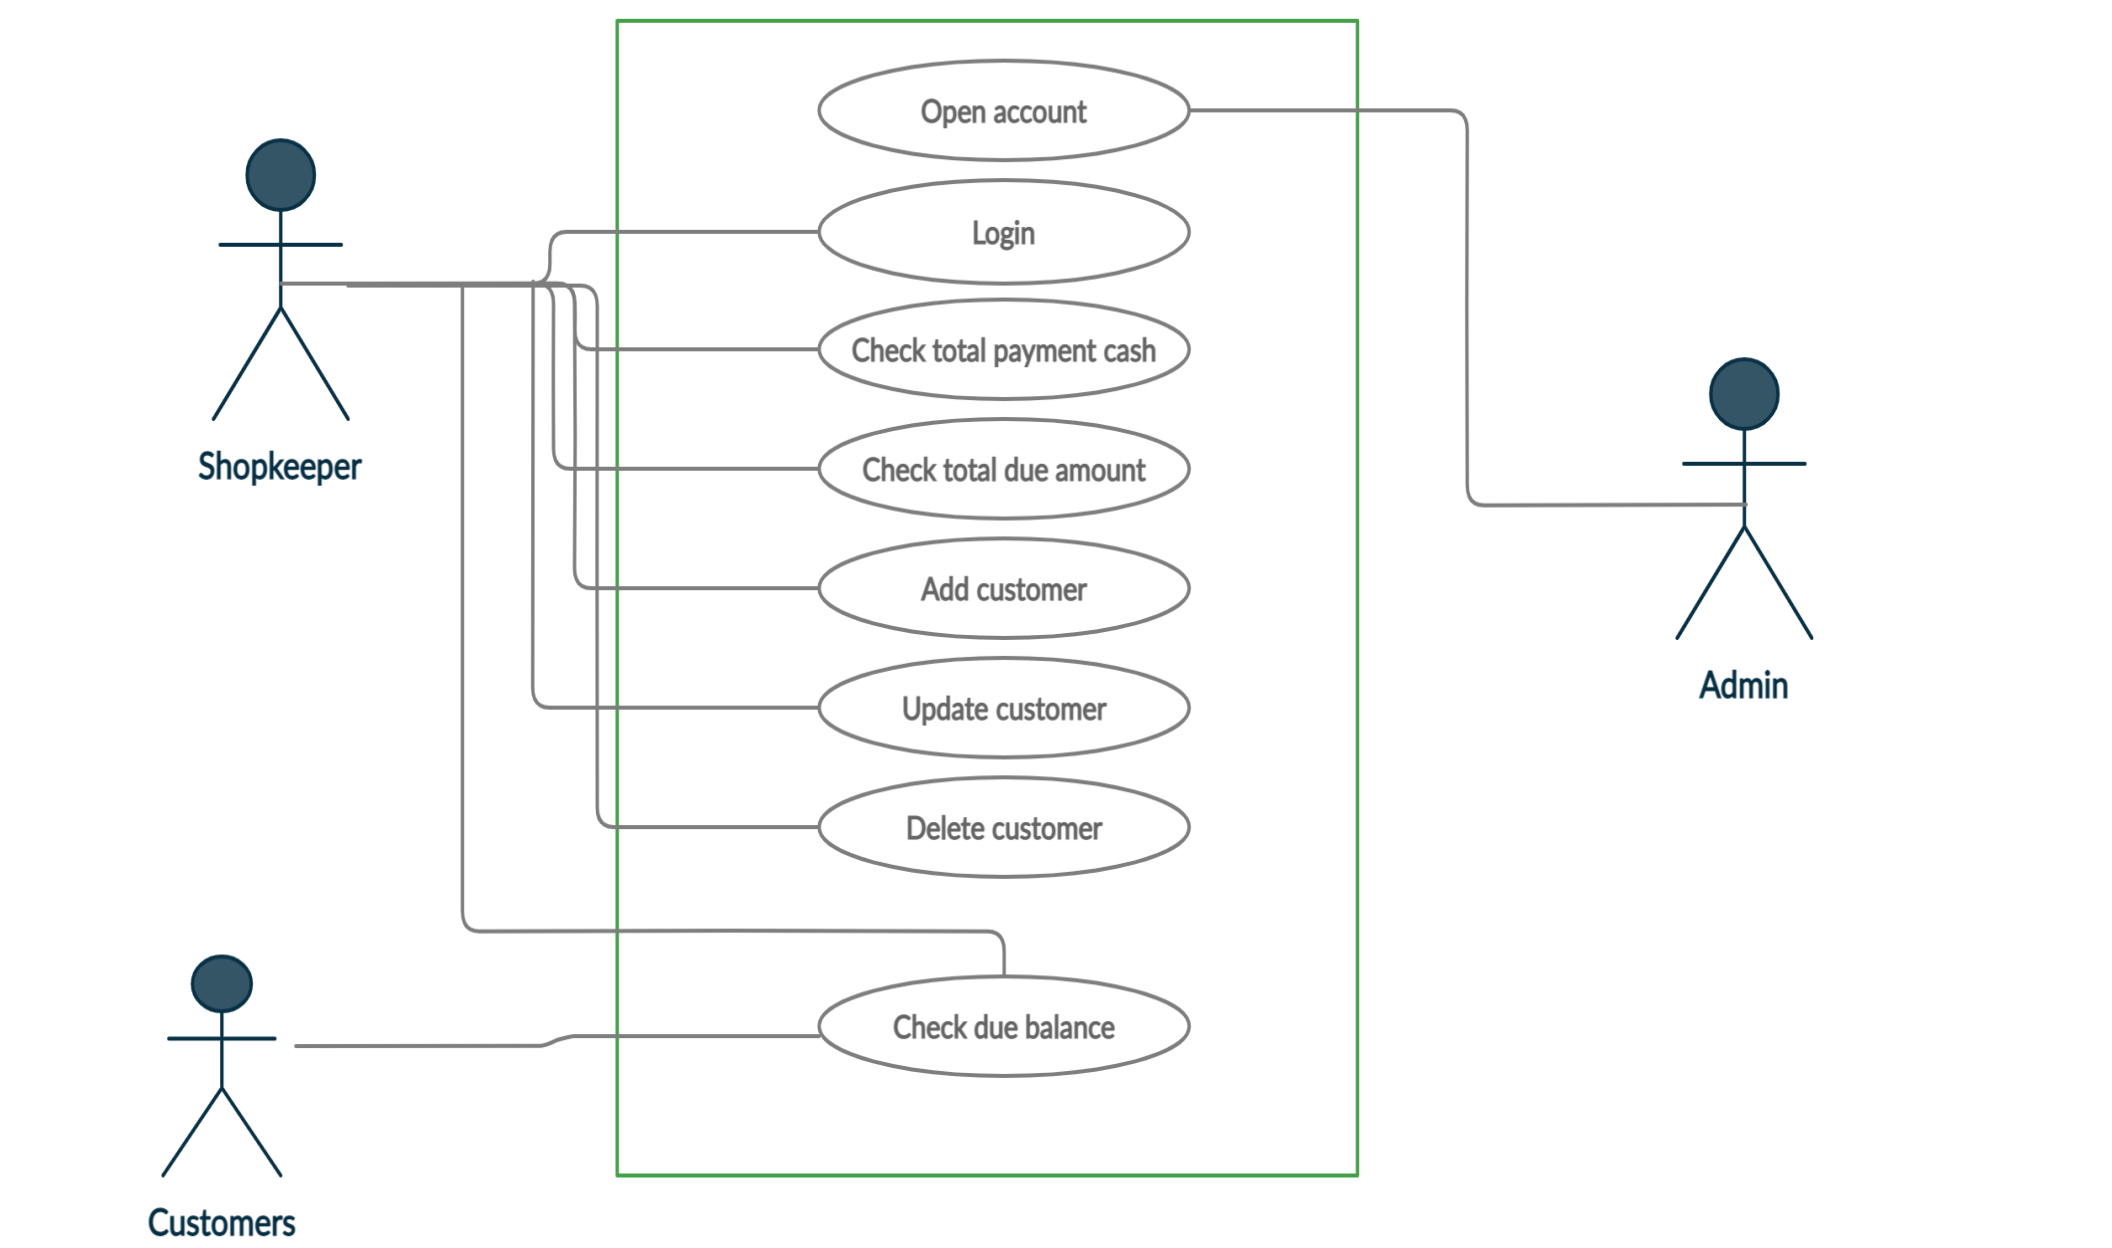

- 1.The shopkeeper can calculate due money very easily and without note book , pen.
- 2.It saves time.
- 3.It accurately calculate every customers due money.

Use-case Diagram

Figures 1

Use-case description

Use Case Name	Open account
Actor	Admin
Use case description	Any shop owner can registration and log in by the admin.
Precondition	User have a email id , password.
Postcondition	Null

Use Case Name	Login
Actor	Shopkeeper
Use case description	After complete the registration then login.
Precondition	User must be registrar.
Postcondition	Null

Use Case Name	Check total payment cash
Actor	Shopkeeper
Use case description	Shop owner calculate how many product are sell in cash in a day.
Precondition	User must be log in in the system
Postcondition	Null

Use Case Name	Check total due amount
Actor	Shopkeeper
Use case description	Shop owner calculate how many product are sell in due amount in a day.
Precondition	User must be log in in the system
Postcondition	Null

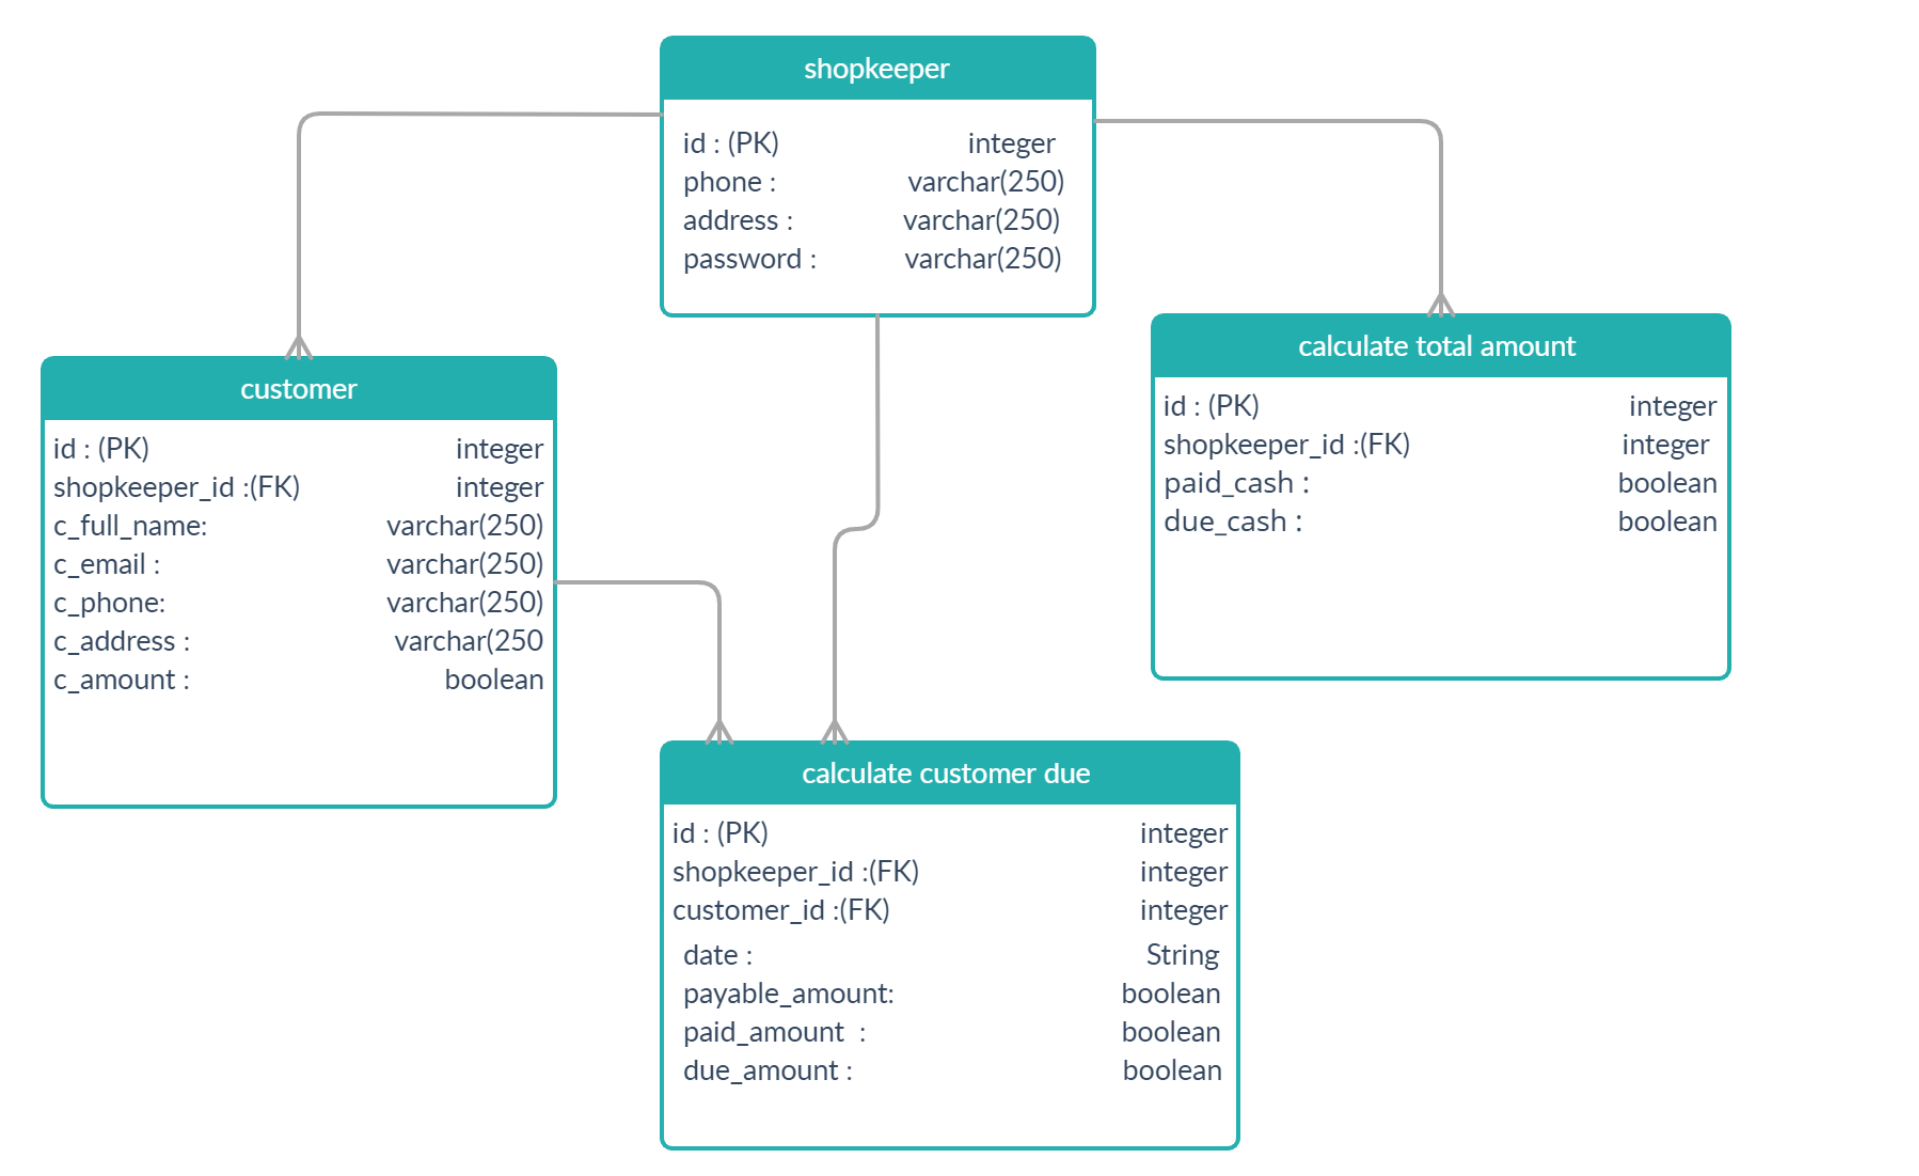

Use Case Name	Add customer
Actor	Shopkeeper
Use case description	Shop owner want to add any customer for due money
Precondition	User must be log in in the system and know customer information
Postcondition	Null

Use Case Name	Update customer
Actor	Shopkeeper
Use case description	Shop owner can update customer information.
Precondition	User must be log in in the system and know customer id for update.
Postcondition	Null

Use Case Name	Delete customer
Actor	Shopkeeper
Use case description	shop owner can delete customer .
Precondition	User must be log in in the system and know customer id for delete.
Postcondition	Null

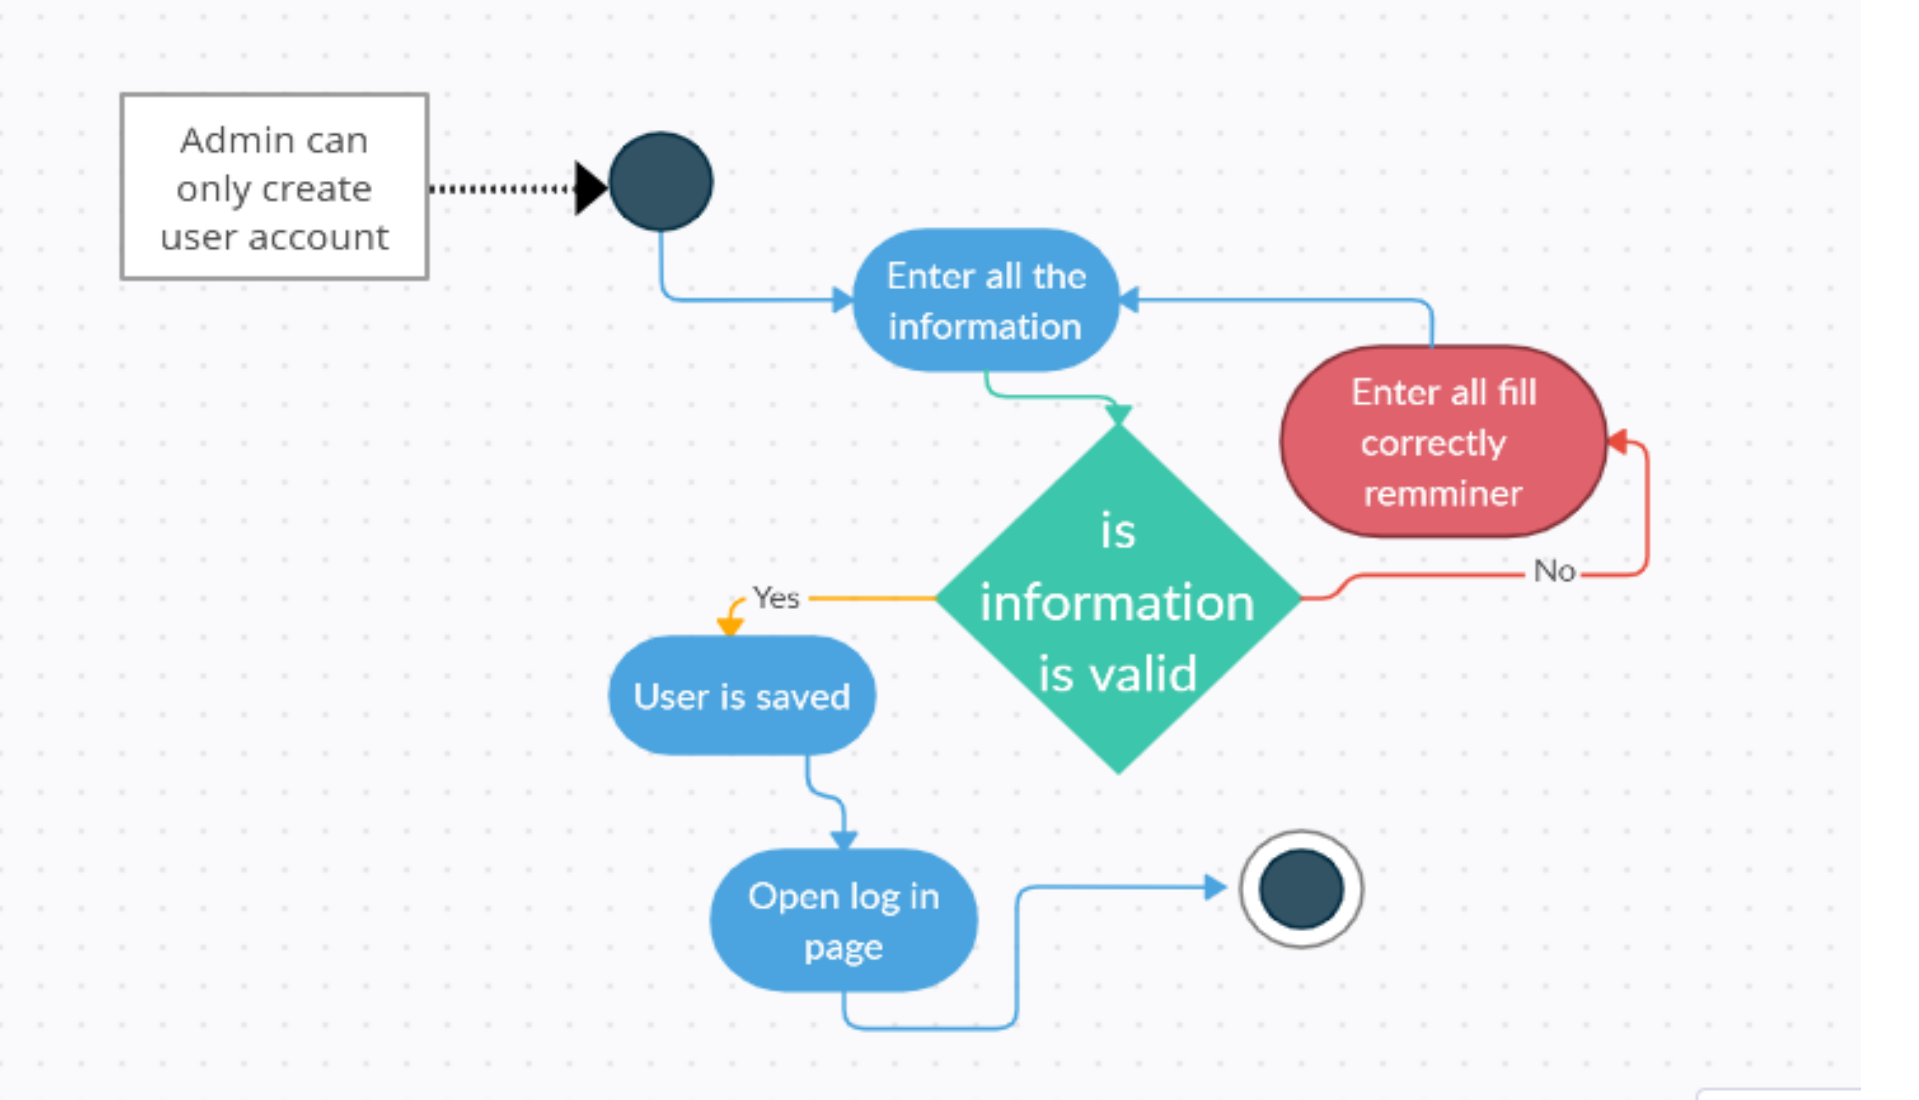

Use Case Name	Check due balance
Actor	Shopkeeper , Customer
Use case description	customer can see her how many due amount
Precondition	know customer id.
Postcondition	Null

Future work

I was fished my work registration page , log in page home page , view profile and update profile with code .

I still have a lot of work left to do add customer page ,delete customer page ,update customer page , check due balance
